PROJECTS

UrFoodie (Yelp Alike)– Self developed an app for users to search, read and write reviews about food trucks around campus / workplace. The app is built on Java, Spring, MVC and SQL.

Shopping List – Independently developed static website that allows its user to input and remove their items for shopping using JavaScript for function, and Bootstrap 4 for user-experience

Student4Student (Craigslist Alike) – Collaborate with team of four to built a responsive web application that allows students to trade with others within the campus, a Register page and a User-to-User message page using JSON, SQL, JavaScript, HTML & CSS
